### **DETAILED ACTION**

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Calabro et al (EP 766 080).

Calabro et al discloses an apparatus and process for control of a combustion application. Calabro et al shows and discloses a combustion control system operated by electric power, having a fuel oxidant supply and operating in response to a distributed feedback (DFB) tunable laser diode (see column 9, line 35). Calabro et al further discloses (column 7, line 47-50) selecting suitable types of laser diodes for a given application, such as GaAlAs diodes which operates in the near infrared bands of 1-2um. Calabro et al discloses applying the disclosed control to monitor chemical species such as O<sub>2</sub>, CO, CO<sub>2</sub> and H<sub>2</sub>O.

Application/Control Number: 09/888,616

Art Unit: 3743

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Frontini et al, Wong, McKinnon et al, VonDrasek et al, Allen and Upschulte et al all discuss monitoring chemical species of gases with diode laser monitors.

## USPTO CONTACT INFORMATION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CARL D. PRICE whose telephone number is 703-308-1953. The examiner can normally be reached on Monday through Friday between 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 703-308-0101. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308/Al /48/0858.
